

Safeway Production Standard Update 5-22-13

The standard issues are set to go to arbitration on August 27, 2013. We have been in contact with IBT engineer and he will be out at Safeway the first week of June to verify all the times before arbitration. The IBT Chief engineer Denny Toland and Robby have also been contacted about the 2 piece pick in liquor. When Robby comes to check the times in June he will also check liquor standards.
